

# CANFIELD SCIENTIFIC

Shipping specialized scientific equipment.

Pak Mail successfully manages the special handling and custom packaging of *Canfield Scientific* shipments nationwide with professional disassembly, packing, crating, and shipment preparation for its sensitive medical imaging systems.

## Introduction

Since 1987, *Canfield Scientific* has been providing custom photographic instruments, image monitoring, and centralized analysis services to the pharmaceutical, biotechnology, and cosmetic industries. Leading plastic surgeons rely on *Canfield Scientific* and its 3D imaging systems in their practices. These systems require delicate handling and are constantly shipped around the world to support clinical research studies.

## Project Requirements

- High-value clinical equipment with risk of damage
- Special documentation and labeling
- Multiple-point packing and shipping procedures
- Nationwide packing and shipping points
- Specific disassembly instructions
- Specific custom packaging
- Scheduled pickups
- Scheduled shipment returns and deliveries
- Door-to-door & inside delivery
- Carrier scheduling and coordination
- Centralized shipment notification

## Challenges

*Canfield Scientific* required a professionally trained freight packing and shipping company to manage its highly sensitive imaging systems. The ongoing project demanded the highest level of expert, custom packaging to properly ship systems to medical facilities worldwide. The packing and shipping of these high-value, sensitive devices requires special protection to ensure the safest and most secure transport. *Canfield Scientific* sought a partner capable of fulfilling this role.

## Solution

Following Pak Mail's custom packaging standards, operators are professionally trained to ship *Canfield Scientific's* imaging systems. Instruments are disassembled under the specific instructions. Cart, positioning stool, face device, hood, brackets, *Intelliflash* and other components are individually prepared for shipping utilizing state-of-the-art, custom freight packaging materials. Each of the dismantled pieces is prepared and placed in custom boxes or hard cases depending upon the fragility of the item, ensuring the highest level of protection during transport. Pak Mail oversees the specialized transport, often cross carrier, of each system to ensure its safe arrival at every destination.
